—The MAILING DATE of this communication appears on the cover sheet beneath the correspondence address---

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, such period shall, by default, expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Status

- ☒ Responsive to communication(s) filed on 10/23/2003
- ☐ This action is **FINAL**.
- ☐ Since this application is in condition for allowance except for formal matters, **prosecution as to the merits is closed** in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

- ☒ Claim(s) 7-16, 21-26 is/are pending in the application.
Of the above claim(s) _____ is/are withdrawn from consideration.
- ☐ Claim(s) _____ is/are allowed.
- ☒ Claim(s) 7-16, 21-26 is/are rejected.
- ☐ Claim(s) _____ is/are objected to.
- ☐ Claim(s) _____ are subject to restriction or election requirement.

Application Papers

- ☐ See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.
- ☐ The proposed drawing correction, filed on _____ is ☐ approved ☐ disapproved.
- ☐ The drawing(s) filed on _____ is/are objected to by the Examiner.
- ☐ The specification is objected to by the Examiner.
- ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119 (a)-(d)

- ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).
 - ☐ All ☐ Some* ☐ None of the CERTIFIED copies of the priority documents have been received.
 - ☐ received in Application No. (Series Code/Serial Number) _____
 - ☐ received in this national stage application from the International Bureau (PCT Rule 1.7.2(a)).

*Certified copies not received: _____

Attachment(s)

- ☐ Information Disclosure Statement(s), PTO-1449, Paper No(s). _____
- ☐ Interview Summary, PTO-413
- ☐ Notice of Reference(s) Cited, PTO-892
- ☐ Notice of Informal Patent Application, PTO-152
- ☐ Notice of Draftsperson's Patent Drawing Review, PTO-948
- ☐ Other _____

Office Action Summary

Serial Number: 09/592907

-2-

Art Unit: 3753

This action is responsive to the communication filed October 23, 2003.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 21-26 and 11-13 are rejected under 35 U.S.C. § 103 as being unpatentable over Rosas et al in view of Kadner. Rosas et al show the claimed valve having a molded cap portion 14 "snapped" to the valve portion 12. The connector 70/72 is read as being releasable in view of the well known nature of such connectors in wiring harnesses in engines. It is inherent that cap 14 is adapted to be snapped to an intake manifold. It is also inherent that the cap can be fitted to the valve with the connector 70/72 at any orientation. One definition of contiguous in the World Book Dictionary, 1978 edition, is "very close together; near; neighboring". Since the overmolded cap of Rosas et al is near the wire and bobbin, and encapsulates them both, the Rosas et al valve fairly responds to the new claim language.

Art Unit: 3753

Rosas et al do not show a second, reduced diameter portion of the valve head received in and "occluding" the aperture. Kadner shows a reciprocating valve with a second portion of reduced cross section occluding the aperture and including an O-ring to seal, which is reliable and long lasting. It would have been obvious for one of ordinary skill in the art to have used such a valve head and seal construction as taught by Kadner in the Rosas et al valve to improve the reliability and length of service of the valve thereof.

Claims 7-10 and 14-16 are rejected under 35 U.S.C. § 103 as being unpatentable over Rosas et al in view of Kadner as applied above and further in view of Koch. Rosas et al, as modified, show the claimed valve except for the pin and pin calibration feature. Koch shows a solenoid valve with pin and pin calibration feature as claimed. It would have been obvious for one of ordinary skill in the art to have used such a pin and pin calibration feature as taught by Koch in the valve of Rosas et al to similarly provide for adjustment of the spring biasing force on the valve.
